

Easily organize and access all your fluid reports, files, data, and models in one centralized workspace.

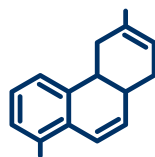

For Everything PVT

Follow and track your fluids from sampling and sample storage, to digitizing and visualizing PVT sample data and associated QA/QCs, to maximizing the available data in a consistent and highly accurate fluid model development, with associated QA/QCs. Further perform PVT calculations and experiments within whitson^{PVT}, or easily export your models to other applications (reservoirs simulation, process simulation, network models, etc).

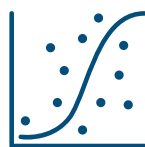

Fluid Data Management

Digitize and organize your fluid samples and PVT data—track storage costs, visualize results, and QA/QC. Import existing fluid models to check thermodynamic consistency, run PVT calculations, and export in multiple formats.

Fluid Model Development

Create C₇₊ characterization for EOS model tuning and viscosity modeling, create child models that honor parent model, and generate PVT tables.

Fluid Model Utilization

Perform basic PVT calculations (flash, sat. pressure, phase envelope, etc.), generate synthetic PVT experiments, and predict your laboratory PVT data with an existing fluid model.

Complimentary Perks for the whitson User Community

As an extension of our software subscription packages, all users get access to the **whitson user community** — a global group of reservoir and production engineers from 120+ companies. It's a space designed to help technical teams stay sharp, up to date, and connected with others solving today's most challenging subsurface problems.

Industry Knowledge Sharing Sessions

Exclusive access to quarterly knowledge-sharing sessions led by technical experts in the industry. Covering everything from RTA best practices to EOS model QA/QC.

Professional Development Course

Over 10 half-day courses per year, free for our users (\$400–\$1500/person for non-subscribers). Topics include nodal analysis, fluid modeling, simulation workflows, and more.

whitCon: Annual Technical Conference

Entry to whitCon, our annual user conference in Houston — with operator-led case studies, deep technical dives, and opportunities to connect and network.

Expert Support Every Step of the Way

Direct access to our technical team — for support, input on workflows, or collaborating on new feature ideas. We are famous for our teams' 2-minute response time!

You're in good company.
Join 120+ companies in our whitson user community.
